CloudGuardAI

AWS Cloud Security Assessment Report

Report ID	76580F2B6FB3	**Assessment Time**	04 Sep 2026, 12:02:18
AWS Account	138218764724	**Account ID**	138218764724
Security Level	Critical	**Risk Score**	**0** / 100

Executive Summary

CloudGuardAI performed an automated security assessment of the connected AWS environment. The assessment evaluates discovered cloud resources and security controls and highlights security conditions that may require attention.

Security Posture: Critical

Finding Summary

Severity	Findings
CRITICAL	1
HIGH	10
MEDIUM	9
LOW	4
UNKNOWN	0
Total	**24**

AWS Resource Inventory

Service	Resources
EC2	5
S3	2
IAM	2
CLOUDTRAIL	0
VPC	0

RDS	0
LAMBDA	0
KMS	0

Security Findings

#1	**S3 Block Public Access is not fully enabled.**	HIGH

Service: S3 BUCKET
Resource: srishakthibucket

Description: S3 Block Public Access is not fully enabled.

Recommended Action: Enable all four S3 Block Public Access settings: BlockPublicAcls, IgnorePublicAcls, BlockPublicPolicy and RestrictPublicBuckets.

#2	**Port 80 is open to the Internet.**	MEDIUM

Service: EC2 SECURITY GROUP
Resource: sg-053346b2b616ccc51

Description: Port 80 is open to the Internet.

Recommended Action: Restrict inbound access to trusted IP addresses or private networks. Avoid exposing administrative ports directly to the Internet.

#3	**SSH (port 22) is open to the Internet.**	HIGH

Service: EC2 SECURITY GROUP
Resource: sg-053346b2b616ccc51

Description: SSH (port 22) is open to the Internet.

Recommended Action: Restrict inbound access to trusted IP addresses or private networks. Avoid exposing administrative ports directly to the Internet.

#4	**Port 80 is open to the Internet.**	MEDIUM

Service: EC2 SECURITY GROUP
Resource: sg-0f0dadfc970b13a3d

Description: Port 80 is open to the Internet.

Recommended Action: Restrict inbound access to trusted IP addresses or private networks. Avoid exposing administrative ports directly to the Internet.

#5	**SSH (port 22) is open to the Internet.**	HIGH

Service: EC2 SECURITY GROUP
Resource: sg-0f0dadfc970b13a3d

Description: SSH (port 22) is open to the Internet.

Recommended Action: Restrict inbound access to trusted IP addresses or private networks. Avoid exposing administrative ports directly to the Internet.

#6	**Port 443 is open to the Internet.**	MEDIUM

Service: EC2 SECURITY GROUP
Resource: sg-0f0dadfc970b13a3d

Description: Port 443 is open to the Internet.

Recommended Action: Restrict inbound access to trusted IP addresses or private networks. Avoid exposing administrative ports directly to the Internet.

#7	**Port 80 is open to the Internet.**	MEDIUM

Service: EC2 SECURITY GROUP
Resource: sg-0022b1a60e0530205

Description: Port 80 is open to the Internet.

Recommended Action: Restrict inbound access to trusted IP addresses or private networks. Avoid exposing administrative ports directly to the Internet.

#8	**SSH (port 22) is open to the Internet.**	HIGH

Service: EC2 SECURITY GROUP
Resource: sg-0022b1a60e0530205

Description: SSH (port 22) is open to the Internet.

Recommended Action: Restrict inbound access to trusted IP addresses or private networks. Avoid exposing administrative ports directly to the Internet.

#9	**MFA is not enabled for IAM user.**	HIGH

Service: IAM USER
Resource: cloudguardai

Description: MFA is not enabled for IAM user.

Recommended Action: Enable Multi-Factor Authentication for the IAM user, especially for privileged or console-enabled accounts.

#10	**IAM access key is active.**	LOW

Service: IAM ACCESS KEY
Resource: AKIASALT27G2K2UIKIHO

Description: IAM access key is active.

Recommended Action: Review the access key regularly and rotate or remove it when no longer required.

#11	IAM user has the AWS AdministratorAccess managed policy.	CRITICAL

Service: IAM USER POLICY
Resource: cloudguardai

Description: IAM user has the AWS AdministratorAccess managed policy.

Recommended Action: Apply least privilege and replace full administrator access with only the permissions required by the user.

#12	MFA is not enabled for IAM user.	HIGH

Service: IAM USER
Resource: digital-will-user

Description: MFA is not enabled for IAM user.

Recommended Action: Enable Multi-Factor Authentication for the IAM user, especially for privileged or console-enabled accounts.

#13	IAM access key is active.	LOW

Service: IAM ACCESS KEY
Resource: AKIASALT27G2CNYKUUVK

Description: IAM access key is active.

Recommended Action: Review the access key regularly and rotate or remove it when no longer required.

#14	CloudTrail trail is not configured.	HIGH

Service: CLOUDTRAIL
Resource: CloudTrail

Description: CloudTrail trail is not configured.

Recommended Action: Create and enable an AWS CloudTrail trail to monitor API activity and security events.

#15	Inbound port 80 is open to the Internet.	MEDIUM

Service: VPC
Resource: sg-053346b2b616ccc51

Description: Inbound port 80 is open to the Internet.

Recommended Action: Restrict the inbound rule to trusted IP addresses or networks.

#16	SSH port 22 is open to the Internet.	HIGH

Service: VPC
Resource: sg-053346b2b616ccc51

Description: SSH port 22 is open to the Internet.

Recommended Action: Restrict SSH access to trusted IP addresses or use a secure management solution such as AWS Systems Manager.

#17	Inbound port 80 is open to the Internet.	MEDIUM

Service: VPC
Resource: sg-0f0dadfc970b13a3d

Description: Inbound port 80 is open to the Internet.

Recommended Action: Restrict the inbound rule to trusted IP addresses or networks.

#18	SSH port 22 is open to the Internet.	HIGH

Service: VPC
Resource: sg-0f0dadfc970b13a3d

Description: SSH port 22 is open to the Internet.

Recommended Action: Restrict SSH access to trusted IP addresses or use a secure management solution such as AWS Systems Manager.

#19	Inbound port 443 is open to the Internet.	MEDIUM

Service: VPC
Resource: sg-0f0dadfc970b13a3d

Description: Inbound port 443 is open to the Internet.

Recommended Action: Restrict the inbound rule to trusted IP addresses or networks.

#20	Inbound port 80 is open to the Internet.	MEDIUM

Service: VPC
Resource: sg-0022b1a60e0530205

Description: Inbound port 80 is open to the Internet.

Recommended Action: Restrict the inbound rule to trusted IP addresses or networks.

#21	SSH port 22 is open to the Internet.	HIGH

Service: VPC
Resource: sg-0022b1a60e0530205

Description: SSH port 22 is open to the Internet.

Recommended Action: Restrict SSH access to trusted IP addresses or use a secure management solution such as AWS Systems Manager.

#22	No RDS database instances were found.	LOW

Service: RDS
Resource: RDS Database

Description: No RDS database instances were found.

Recommended Action: No action required.

#23	No Lambda functions were found.	LOW

Service: LAMBDA
Resource: Lambda Functions

Description: No Lambda functions were found.

Recommended Action: No action required.

#24	No KMS keys were discovered.	MEDIUM

Service: KMS
Resource: KMS Keys

Description: No KMS keys were discovered.

Recommended Action: Review encryption requirements and use appropriate AWS KMS keys for protected data.

Generated Remediation Policies

The following policy guidance was associated with the assessment.

Service	Policy / Guidance
S3	Enable Block Public Access on the S3 bucket.
EC2	Restrict SSH (22) to trusted IP ranges.
EC2	Restrict SSH (22) to trusted IP ranges.
EC2	Restrict SSH (22) to trusted IP ranges.
EC2	Restrict SSH (22) to trusted IP ranges.
EC2	Restrict SSH (22) to trusted IP ranges.
EC2	Restrict SSH (22) to trusted IP ranges.

Report Scope & Disclaimer

This report represents the security state observed during the referenced CloudGuardAI assessment. Security findings and scores are based on the AWS resources and permissions available to the scanner at assessment time. A passing result does not guarantee that the environment is completely secure. Organizations should validate findings and apply changes according to their own operational, security, and compliance requirements.
